

App. No. 10/014,703

Amdt. Dated: 02/17/2005

Off. Act. Dated: 11/17/2004

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the place and prior to application:

Listing of Claims:

1. (original): A method comprising:  
determining an overrun in the encoding of an input bitstream;  
determining the severity of the overrun; and  
encoding a current frame using at least one catch-up mode to process the overrun.
2. (original): The method of claim 1 wherein encoding occurs without skipping a frame of the input bitstream.
3. (original): The method of claim 1 further comprising:  
determining an anticipated finishing time for the encoding.
4. (original): The method of claim 3 wherein determining the severity of the overrun is based on upon the anticipated finishing time.
5. (original): The method of claim 1 wherein determining the overrun occurs before encoding a next frame.
6. (original): The method of claim 1 wherein a subsequent overrun does not occur during the catch-up processing.

Amdt. Dated: 02/17/2005  
Off. Act. Dated: 11/17/2004

7. (original): The method of claim 1 wherein a plurality of catch-up modes are available to speed-up encoding of the bitstream.

8. (original): The method of claim 1 wherein the catch-up mode contains a plurality of rate control processes.

9. (original): A system comprising:  
a catch-up controller to determine an overrun in the encoding of an input bitstream and to determine the severity of the overrun; and  
an encoder to encode a current frame using at least one catch-up mode to process the overrun.

10. (original): The system of claim 9 wherein the encoder encodes the input bitstream without skipping a frame of the input bitstream.

11. (original): The system of claim 9 wherein the encoder further determines an anticipated finishing time for the encoding.

12. (original): The system of claim 11 wherein the encoder determines the severity of the overrun based upon the anticipated finishing time.

13. (original): The system of claim 9 wherein the encoder determines the overrun before encoding a next frame.

14. (original): The system of claim 9 wherein a subsequent overrun does not occur during the catch-up processing.

~~15. (original): The system of claim 9 wherein a plurality of catch-up modes are available to speed-up encoding of the bitstream.~~

16. (original): The system of claim 9 wherein the catch-up mode contains a plurality of rate control processes.

17. (currently amended): The system of claim 16 wherein each of the plurality of rate ~~control~~ control processes avoids quality loss of the bitstream.

18. (original): The system of claim 9 wherein the encoder uses a plurality of catch-up modes to produce short catch-up times and good catch-up quality.

19. (original): A system comprising:  
means for determining an overrun;  
means for determining the severity of the overrun; and  
means for encoding a current frame using at least one catch-up modes to process the overrun.

20. (original): A computer readable medium comprising instructions, which when executed on a processor, perform a method for timeshifting the encoding and decoding of a bitstream, the system comprising:  
means for determining an overrun;  
means for determining the severity of the overrun; and  
means for encoding a current frame using at least one catch-up modes to process the overrun.

**BEST AVAILABLE IMAGES**

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:

- ☐ BLACK BORDERS
- ☐ IMAGE CUT OFF AT TOP, BOTTOM OR SIDES
- ☐ FADED TEXT OR DRAWING
- ☐ BLURRED OR ILLEGIBLE TEXT OR DRAWING
- ☐ SKEWED/SLANTED IMAGES
- ☐ COLOR OR BLACK AND WHITE PHOTOGRAPHS
- ☐ GRAY SCALE DOCUMENTS
- ☒ LINES OR MARKS ON ORIGINAL DOCUMENT
- ☐ REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY
- ☐ OTHER: \_\_\_\_\_

**IMAGES ARE BEST AVAILABLE COPY.**

**As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.**
